## 3M™ Sterile U

You're busy. Your staff are busy. Yet it's vitally important that everyone keeps up with the latest advances in sterilization technology, processes and standards. That's why we created 3M Sterile U, a network of the most up-to-date educational services and training resources which 3M has to offer. 3M Sterile U is dedicated to improving the competency and confidence of sterile processing professionals, and it's structured to let you learn at your own pace and at times that are convenient for you.

### Webinars

Our popular 3M Sterile U webinars are free, interactive programs that tackle today's most important sterilization issues.

If you would like to be informed of upcoming webinar events then please email our education team at [3MHealthcareEDU@mmm.com](mailto:3MHealthcareEDU@mmm.com) and request to be added to the invite list for 3M Sterile U.

### Website

The Learning connection website is the one location where you can find all 3M Sterilization educational materials including recordings of past 3M Sterile U webinars.

To join the learning connection, just go to [3m.webcentral.com.au](http://3m.webcentral.com.au) and register for free access to all resources. Be sure to bookmark the URL for ongoing access.

## A selection of 3M Sterile U Webinars that you will find at 3M Learning Connection include:

### Unwrapping the Standard: Where do you start.

As part of the on-going STERILE-U education series, this webinar will increase your technical and practical approach to the newly published standard AS/NZS 4187:2014.

The first part of the webinar will highlight the fundamental elements / frameworks which take a quality / risk management approach to implementing the standard into your facility.

The second part of the webinar focuses on application of validation techniques and its fundamental importance to the success of a quality management and risk base approach to a system.

### Performance of Steam Penetration Tests

In this webinar, Joost provides an introduction to infection control, decontamination and steam sterilisation principles. He goes on to explain the principles of air removal that occurs during the steam sterilisation process and how steam penetration tests are used throughout the world referencing international standards. He also provides insight into the research involved with steam penetration tests and results research.

### Application of International Standards for Chemical Indicators

In this webinar, Steven explains in an easy way to remember, the performance characteristics of Class 5 and Class 6 chemical indicators. He also provides insight into how chemical indicators are tested in the lab setting and what current international standards (ISO, ANSI/AAMI, AS/NZS) say about the use of Class 5 and Class 6 indicators.
